EDUCATION

Bina Nusantara University, West Jakarta, Jakarta *Expected 2028*
Undergraduate in Computer Science, Streaming in Intelligent Systems (AI) *GPA: 3.85/4.00*

WORK EXPERIENCE

Database Administrator Staff, SLC Binus University *Jan 2026 – Present*

- Managed exam schedules and allocation for laboratory subjects across six campuses (Kemanggisan, Alam Sutera, Bekasi, Bandung, Malang, and Semarang).
- Optimized queries and scheduled jobs for exam schedules and student enrollment records.
- Maintained web applications (React/ASP.NET) to support internal and external laboratory activities.
- Handled daily requests associated with data collection.

Laboratory Assistant, PPTI BCA Sentul *Aug 2025 – Dec 2025*

- Taught hands-on coding for Algorithm and Programming (Basic Algorithm Programming using C) for BCA Scholarship Students across 3 classes weekly for 5 months.

Laboratory Assistant, SLC Binus University *Feb 2025 – Jan 2026*

- Taught hands-on coding across 6–7 classes per semester covering subjects such as Network Penetration Testing using Kali Linux, OOP and Design Patterns using Java, Database using MySQL, NLP, Computer Graphics using Three.js, etc.
- Built multiple assessment cases and marked grades for **200+** student submissions according to a consistent standard.
- Built and presented 5 mandatory development projects (Test Progressive Assistant / TPA) covering Unity game, Tauri/React desktop apps, Go/React web with gRPC, DevOps (Kubernetes, Docker), and LibGDX/Kotlin/Firebase mobile game.
- Qualified to teach **83%** of 235 SLC-managed subjects and achieved an average student satisfaction rating of **99%**.
- Served as New Assistant Recruitment Trainer and Subject Coordinator, managing jobdesks, evaluating trainees, and delivering presentation materials.
- Awarded as Best Assistant Candidate for fulfilling strict requirements.

TECHNICAL SKILLS

- **Languages:** C/C++, Java, Python, Go, Rust, TypeScript, JavaScript, HTML, CSS, Kotlin
- **Frameworks:** React, Next.js, Nest.js, Express.js, Tauri, LibGDX
- **ORMs & Architectures:** SeaORM, Sequelize, Prisma — MVC, Hexagonal, Microservices
- **Cloud & DevOps:** Docker, Kubernetes, Azure, Terraform, Ansible, GitHub Actions, Proxmox
- **Databases & Storage:** SQL Server (Primary), MySQL, MongoDB, Firebase, Supabase, PostgreSQL, Redis, Memcached, MinIO, ChromaDB
- **Networking & Security:** MikroTik Configuration, Cisco Packet Tracer Simulations, Kali Linux Tools
- **AI/ML:** Deep Learning (CNN, ResNet50), Computer Vision, Speech Recognition, NLP, LLMs, RAG

PROJECTS

SurVace – Full Stack Web Application & Microservices

- Built a TikTok clone using React and Go, structured on Hexagonal Architecture and microservices connected via gRPC and gRPC-Web.
- Integrated a hand sign recognition system using Convolutional Neural Networks (CNN).

- Implemented Redis caching, MinIO object storage, and a recommendation system algorithm with infinite-scrolling video playback.

Research Paper on RAG

- Authored research titled "Evaluating the Efficacy of RAG-Enhanced Local LLMs in Cross-lingual Medical Information Retrieval: A Case Study on Indonesian to English Retrieval".
- Accepted at the ICISS2026 conference and published on IEEE Xplore.

YoshiKoya – Desktop Application

- Developed a high-performance desktop application using React, Tauri (Rust), and Tailwind CSS.
- Modeled complex system behaviors using UML activity diagrams.

Grow Safari: Infinite Lands – Mobile Game

- Engineered core gameplay logic (movement, building mechanics) for a 2D grid-based zoo tycoon game using LibGDX, Kotlin, and Firebase.
- Designed UI/UX assets and game cover for Play Store listing to optimize user engagement.

ACADEMIC ACHIEVEMENTS

- Microsoft Certified: Azure AI Fundamentals
